Products and Services 

Product Name 

Product Description 

Viso Suite

A no-code platform for building, deploying, and scaling computer vision applications, covering the entire AI lifecycle from data collection to edge deployment and monitoring.

Data Collection

Automated tools for gathering high-quality training data for computer vision annotation, including remote recording and data connectors.

Data Annotation

Tools for annotating image and video data, supporting both automated and semi-automated labeling, and managing datasets within a secure workspace.

AI Model Training

Management of AI models across various frameworks, including training custom models and using pre-trained models, with built-in version control.

Application Development

Visual editor for creating computer vision applications using modular building blocks, integrating cameras, AI models, and processing hardware.

Edge Deployment

Tools for deploying computer vision applications at scale, including device management and automated deployment for large fleets.
